

Environmental Policy Statement

This is the Environmental Policy Statement of Clear Environmental Consultants Limited

It is the policy of Clear Environmental Consultants Limited (Clear) to conduct our business in an environmentally responsible manner. We accept that concern for the environment and sustainability should influence the services provided by the Company and be incorporated into those services where appropriate and practicable.

In implementing the policy, we will:

- Ensure compliance, as a minimum standard, with all relevant environmental legislation;
- Minimise the use of natural resources, monitor progress and regularly review.
- Wherever practicable, comply with codes of practice and other requirements, for example as specified by our customers, in an attempt to prevent, reduce and control pollution of the environment;
- Take environmental impact into account in the planning, design and implementation of our projects to help prevent pollution;
- Incorporate environmental and sustainability considerations into our designs and practices with regard to the use of materials, energy consumption, waste disposal and recycling;
- Continue to monitor the implementation, the performance and improve the environmental policy on a regular basis, through continuous improvement and the provision of adequate resources.
- Sustain a commitment to continuous improvement, to be achieved through regular review of this policy and via the Environmental Management System.

We recognise that our environmental responsibilities extend to the operations at our own premises and that these also have environmental consequences. This policy, therefore, extends to cover the premises we occupy and the materials we use.
